

- 20 years in IT security
- Pioneers in proxy technology
- Flexible, black-belt engineering team
- Technology enthusiasts
- Solutions for the latest security threats
- Strong focus on R&D and innovation
- Made in EU

ABOUT BALASYS

Balasys is a leading IT security vendor in Central Europe. It made a name in 2000 by building the world's first modular proxy firewall based on the Zero Trust principles. Since then, it has rounded out its Zero Trust portfolio with its own network security software and leading third-party identity management solutions used by many Fortune 100 companies and complemented by world-class delivery services. Balasys is committed to

continuous innovation and is pioneering solutions to protect APIs, industrial control systems (ICS), IoT and legacy systems. The latest jewel in its Zero Trust portfolio is the Proxedo API Lifecycle Platform, which provides API management, web application security and fraud prevention in addition to deep protection of API infrastructures.

Balasys Proxedo Family

PROXEDO API LIFECYCLE PLATFORM

Don't let your APIs turn against you

The Proxedo API Lifecycle Platform (PALP) is a modular solution that allows you to protect and manage your APIs. PALP provides an end-to-end API security toolset helping your enterprise prevent API-specific threats, automated attacks, APTs and frauds. Its core component is API Security, a specialized security gateway that controls and monitors the API traffic in detail. Beyond the API security core, the portfolio includes API management, web application firewall and fraud detection. These enhanced functional modules work closely with the API security module adding a comprehensive security and management layer to your API environment.

- API Security offers deep packet inspection (DPI) technology to enforce custom security policies without compromise.
- API Management supports your developer and subscriber communities to manage and secure the entire API lifecycle.
- Web Application Firewall protects your web services by monitoring and filtering HTTP traffic.
- Fraud Detection reduces the number of fraudulent transactions by harnessing device fingerprinting and enriching incoming data.

PROXEDO NETWORK SECURITY

Flexible Protection of Enterprise Networks

Proxedo Network Security (PNS) is a highly flexible, multipurpose network security suite which can granularly control traffic to protect enterprises from advanced cyber threats. PNS provides deep packet inspection (DPI) of regular and encrypted network communication and has the capability to filter and modify its content. Thanks to its flexible architecture and scriptable configuration, your organization can implement ANY security policy, including the Zero Trust model. With PNS, you can manage custom security problems which your firewalls are unable to solve.

- Zero Trust security
- Separation of critical systems
- Network authentication
- Network monitoring & debugging
- Multi-layer threat detection
- Network privacy & encryption
- Network security compliance & audit

ONE IDENTITY

Unified Identity Security

One Identity, a Quest Software business, lets organizations achieve an identity-centered security strategy with a uniquely broad and integrated portfolio of identity management offerings including account management, identity governance and administration and privileged access management. One Identity and its approach is trusted by customers worldwide, where more than 7,500 organizations worldwide depend on One Identity solutions to manage more than 125 million identities, enhancing their agility and efficiency while securing access to their systems and data – on-prem, cloud or hybrid.

- Identity Governance and Administration
- Active Directory Account Lifecycle Management
- Privileged Access Management
- Enterprise-class Log Management

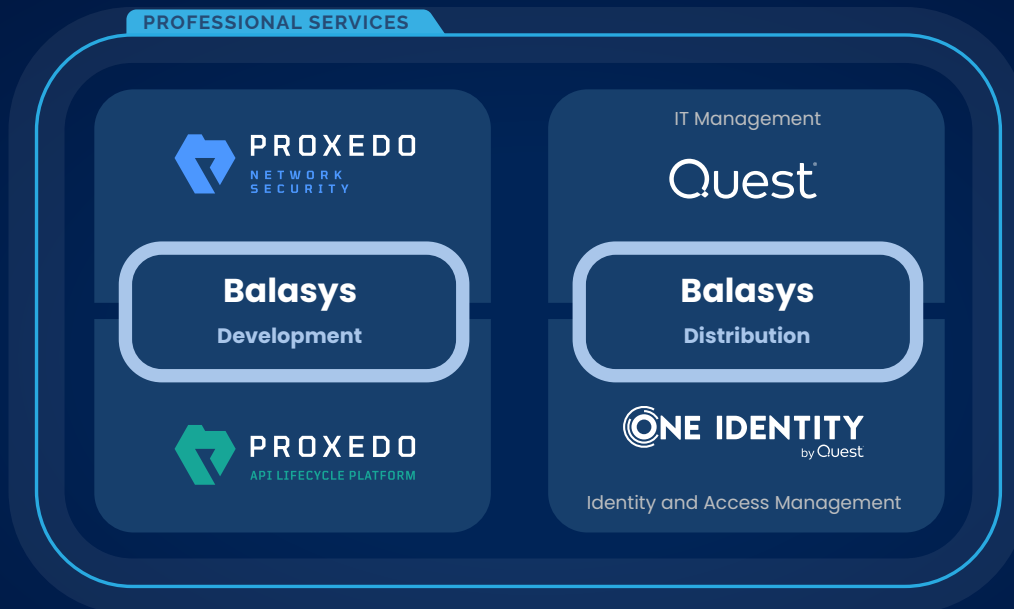

QUEST

Where Next Meets Now

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Around the globe, more than 130,000 companies and 95% of the Fortune 500 count on Quest to deliver proactive management and monitoring for the next enterprise initiative, find the next solution for complex Microsoft challenges and stay ahead of the next threat.

- Unified Endpoint Management
- Data Protection
- Database Management
- Microsoft Platform Management
- Performance Monitoring

PROFESSIONAL SERVICES

Professional Services

The Balasys Professional Services team helps you design, deploy, and customize Balasys, One Identity and Quest solutions on-site. Beyond the delivery of our own developed solutions, we are the largest solution delivery partner of One Identity in the CEE region. From simple start-up integrations to more complex projects, we offer a full range of services to ensure smooth deployment, from the initial project scoping to post-integration support.

- Project scoping, design, deployment and customization
- Management of Zero Trust transformation projects
- Classroom and online trainings
- Highly skilled, senior engineering team
- 24/7 vendor support
- Privileged support services
